Current as of 26 June 1973

TM 5-4940-225-34P, 20 July 1972 is changed as follows:

All changes, additions, or deletions will be indicated in the appropriate indexes of the manual.

Page v. Paragraph 7 is superseded as follows:

Reporting of Equipment Publication Improvements

The reporting of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be submitted on DA Form 2028 (Recommended Changes to Publications) and forwarded direct to Commander, US Army Troop Support Command, ATTN: AMSTS-MPP, 4300 Goodfellow Boulevard, St. Louis, MO 63120.

Page 1, line item 11. In colm (3), change the nomenclature to read STRAP GUARD: LEFT.

Line item 12. In colm (3), change the nomenclature to STRAP GUARD: RIGHT.

Page 2, line item 3. In colm (3), change the mfr code to (15548).

Line item 10. In colm (2), add 6105-760-4242.

Line item 11. In colm (2), add 5305-052-6920; in colm (3) change the mfr code and part No. to MS 24629-56(96906),

Line item 13. In colm (2), add 5330-003-9273.

Line item 20. In colm (2), add 5310-486-8403.

Page 3, line item 1. In colm (2), add 5307-759-6747.

Line item 6. In colm (3), change ANNULAR to REAR.

Line item 10. In colm (3), change ANNULAR to FRONT.

Line item 11. In colm (1) change the SMR code to X1F.

Line item 12. In colm (1) change the SMR code to X2F.

Line item 13. In colm (2), add 6105-433-5796; in colm (3), change the part number to A-S8T4CA20C5A.

Line item 14. The winding kit is deleted entirely.

Line item 16. In colm (2), add 4310-430-6431.

Page 4, line item 2. In colm (3), change the nomenclature to FILTER ELEMENT.

Line item 3. In colm (3), change the nomenclature to BOWL ELEMENT.

Line item 6. In colm (2), add 4730-451-3350.

Line item 8. In colm (2), add 4730-430-6447.

Line item 10. In colm (3), change the nomenclature to UNLOADER VALVE.

Line item 13. In colm (2), add 5315-763-0298.

Line item 14. In colm (2), add 4310-433-3492.

Line item 17. In colm (1), change the SMR code to P2F; in colm (2), add 5315-763-0295.

Page 6. Line 19 is changed as follows: In colm 1, change SMR code to P2F; col 2, add FSN 4310-790-4558.

Page 7. Line 7. In colm (2), add FSN 5310-487-4919.
Line 13. In colm (2), add 5307-721-4340.
Line. 15. In colm (1); change SMR code to P2F; colm (2), add FSN 5315-780-8475.
Line 16. In colm (2), add FSN 4730-044-4583.

Line 17. In colm (2), add 4730-430-6542.
Line 18. In colm (2), add FSN 4730-433-3470.
Line 20. In colm (1), change SMR code to P20; colm(2), add FSN 5315-819-3274.
Line 21. In colm (1), change SMR code to P20; colm (2), add FSN 4310-445-0511.

Page 8, line 5. In colm (2), add FSN 5305-225-8499.
Line 7. In colm (2), add FSN 4310-451-3608.

Page 10, line 10. In colm (3), change the part No. to CK1601.

Page 11, line 4. In colm (3), change the part No. to 11CB3BX18.
Line 5. In colm (2), add 5305-720-9989.

Line item 13. In colm (2), add 5305-978-9368.
Line item 16. In colm (2), add 4720-767-6196.
Line item 18. In colm (2), add 4710-472-2682.

Line item 21. In colm (3), change the part No. to MS51819-14.
Page 12, line 3. In colm (2), add 4730-580-7417.
Line item 9. In colm (2), add 4730-196-1493.
Line item 12. In colm (2), add 4730-044-4035.
Line item 13. In colm (2), add 4820-767-6055.
Line item 18. In colm (2), add 5340-079-7837.
Page 13, line item 5. In colm (2), add FSN 4820-477-7376.
Line item 11. In colm (2), add 5305-879-7941.
Line item 16. In colm (3), add part No. and mfr code: WW-U-531 (81348)
Page 14, line item 20. In colm (2), add 5305-269-3219.
Page 15, line item 14. In colm (2), add 3030-833-3086.
Page 16, line item 1. In colm (2), add 4910-006-9529.
Line item 4. In colm (2), add 5310-452-1357.
Line item 15. In colm (2), add 5325-765-4317.
Line item 17. In colm (2), add 5305-993-1633; in colm (3), change the mfr code and part No. to MS24629-9 (96906).
Page 17, line item 2. In colm (2), change the FSN to 5305-984-4889.

Line item 5. In colm (2), add 5310-013-4530; colm (3), change the mfr code and part No. to MS35649-61 (96906).
Line item 7. In colm (2), add 5305-720-0036.
Line item 9. In colm (2), add 5306-225-8492.

Page 18, *line 6.* In colm (2), add 5945-420-1278.

Line item 10. In colm (2), add 5305-855-0960.
Line item 14. In colm (2), add 5305-855-0973.
Line item 16. In colm (2), add 5305-855-0958.
Line item 19. In colm (3), change the part No. to MIL-H-13531. TYPE 1 CL-2.
Page 19, *line 4.* In colm (2), add 5310-935-9757; in colm (3), change the mfr code and part No. to MS35649-282 (96906).
Line item 5. In colm (2), add 5310-707-0694.
Line item 15. In colm (2), add 5925-965-7250.
Page 20;
Line item 6. In colm (2), add 5305-004-1553.
Line item 8. In colm (2), add 5905-434-2611.
Line item 18. In colm (2), add 5930-759-8345.
Page 21, line item 1. In colm (3), change the mfr code to (90201).
Line item 3. In colm (2), add 5305-890-4789.
Page 22, line 17. In colm (3), change the mfr code no. to (77342).
Line item 20 In colm (2), add 5305-720-8881.
Page 23, line item 10. In colm (3), change VARIABLE to 20 ohm, 100 watt.
Line item 12. In colm (2), add 5305-869-4609.
Line item 17. In colm (2), add 5305-759-6859.

Page 24, line item 1. In colm (2), add 5945-420-1273.

Line item 13. In colm (2), add 5305-890-4792.

SECTION I.

INTRODUCTION

1. Scope

a. This manual lists the repair parts required for the performance of direct support, general support, and depot maintenance of the shop equipment.

b. Repair parts listed represent those authorized for use at indicated maintenance levels and will be requisitioned on an "as required" basis until stockage is justified by demand in accordance with AR 710-2.

2. General

This Repair Parts and Special Tools List is divided into the following sections:

a. Repair Parts List - Section II. A list of repair parts authorized at the direct support, general support, and depot levels for the performance of maintenance. The list also includes parts which must be removed for the replacement of the authorized parts. Parts lists are composed of assembly groups in ascending numerical sequence, with parts in each group listed in figure and item number sequence.

b. Special Tools, Test and Support Equipment - Section III. (Not applicable.)

c. Federal Stock Number and Reference Number Index - Section IV. A list, in ascending numerical sequence, of all Federal Stock Numbers appearing in the listings, followed by a list, in alphanumeric sequence, of all reference numbers appearing in the listings. Federal stock number and reference numbers are cross-referenced to each illustration figure and/or item number appearance.

3. Explanation of Columns

The following provides an explanation of columns found in the tabular list in Section II.

a. Source, Maintenance, and Recoverability Code (SMR).

(1) Source code indicates the source for the listed items. Source Codes are:

Code	Explanation
P	Repair Parts, Special Tools and Test Equipment supplied from GSA/DSA or Army supply system, and authorized for use at indicated maintenance levels.
P2	Repair Parts, Special Tools and Test Equipment which are procured and stocked for insurance purposes because the combat or military essentiality of the end item dictates that a minimum quantity be available in the supply system.
P9	Assigned to items which are NSA design controlled unique repair parts, special tools, test, measuring, and diagnostic equipment which are stocked and supplied by the Army COMSEC Logistic System and which are not subject to the provisions of AR 380-41.
P10	Assigned to items which are NSA design controlled special tools, test, measuring, and diagnostic equipment for COMSEC support which are accountable under the provisions of AR 380-41 and which are stocked and supplied by the Army COMSEC Logistic System.
M	Repair Parts, Special Tools and Test Equipment which are not procured or stocked as such in the supply system but are to be manufactured at indicated maintenance levels.
A	Assemblies which are not procured or stocked as such, but are made up of two or more units. Such component units carry individual stock numbers and descriptions, are procured and stocked separately, and can be assembled to form the required assembly at indicated maintenance levels.
X	Parts and assemblies that are not procured or stocked because the failure rate is normally below that of the applicable end item or component. The failure of such part or assembly should result in retirement of the end item from the supply system.
X1	Repair Parts which are not procured or stocked. The requirement for such items will be filled by the next higher assembly or component.
X2	Repair Parts, Special Tools and Test Equipment which are not stocked and have no foreseen mortality. The indicated maintenance level requiring such repair parts will attempt to obtain the parts through cannibalization or salvage. The item may be requisitioned with exception data, from the end item manager for immediate use.
G	Major assemblies that are procured with PEMA funds for initial issue only as exchange assemblies at DS and GS level. These assemblies will not be stocked above DS and GS level or returned to depot supply level.

NOTE

Cannibalization or salvage may be used as a

source of supply for any items source coded X1 and aircraft support items as restricted by AR 700-42.

(2) Maintenance code indicates the lowest level of maintenance authorized to install the repair part and/or use the special tool or test equipment for each application. Capabilities or higher maintenance categories are considered equal or better. Maintenance codes are:

Code	Explanation
C	Crew/Operator
O	Organizational Maintenance
F	Direct Support Maintenance
H	General Support Maintenance
D	Depot Maintenance

(3) Recoverability code indicates whether unserviceable items should be returned for recovery or salvage. Items not coded are nonrecoverable. Recoverability codes are:

Code	Explanation
R	Repair Parts (assemblies and components), special tools and test equipment which are considered economically reparable at direct and general support maintenance levels. When the item is no longer economically reparable, it is normally disposed of at the GS level. When supply consideration dictate, some of the repair parts may be listed for automatic return to supply for depot level repair as set forth in AR 710-50. When so listed, they will be replaced by supply on an exchange basis.
S	Repair Parts, Special Tools, Test Equipment and assemblies which are economically reparable at DS and GS activities and which normally are furnished by supply on an exchange basis. When items are determined by a GSU to be uneconomically reparable, they will be evacuated to a depot for evaluation and analysis before final disposition.
T	High dollar value recoverable repair parts, special tools and test equipment which are subject to special handling and are issued on an exchange basis. Such items will be repaired or overhauled at depot maintenance activities only. No repair may be accomplished at lower levels.
U	Repair Parts, Tools, and Test Equipment specifically selected for salvage by reclamation units because of precious metal content, critical materials, high dollar value or reusable casings or castings.

b. Federal Stock Number. Indicates the Federal stock number assigned to the item and will be used for requisitioning purposes.

c. Description. Indicates the Federal item name and a minimum description required to identify the item. The last line indicates the reference number followed by the applicable Federal Supply Code for Manufacturer (FSCM) in parentheses. The FSCM is used as an element in item identification to designate manufacturer or distributor or Government agency, etc., and is identified in SB 708-42. Items that are included in kits and sets are listed below the name of the kit or set with quantity of each item in the kit or set indicated in front of the item name.

d. Unit of Measure (U/M). Indicates the standard or basic quantity by which the listed item is used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviation, e.g., ea, in, pr, etc., and is the basis used to indicate quantities and allowances in subsequent columns.

e. Quantity Incorporated in Unit. This column indicates the quantity of the item used in an assembly group. A "U" appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated. (e.g., shims, spacers, etc.)

f. Thirty-Day DS/GS Maintenance Allowances. Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

g. One-Year Allowance Per 100 Equipments/Contingency Planning Purposes. Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

h. Depot Maintenance Allouance Per 100 Equipments. Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

i. Illustration. This column is divided as follows:

(1) *Figure number.* Indicates the figure number of the illustration on which the item is shown.

(2) *Item number.* Indicates the callout number used to reference the item in the illustration.

4. Special Information

a. Usable on codes are included in Column 3. Uncoded items are applicable to all models and/or serial number range. Identifications of the usable on codes used in this publication are:

Code	Used on
A	Model SEORLT

b. Parts which require manufacture or assembly at a level higher than that authorized for installation will indicate in the source column the higher level.

c. Repair parts kits and gasket sets appear as the last entries in the repair parts listing for the group or assembly to which they apply.

d. The following publications pertain to shop equipment and its components:

TM 5-4940-225-12	Operator and Organizational Maintenance Manual
LO 5-4940-225-12	Lubrication Order
TM 5-4940-225-34	Direct and General Support, and Depot Maintenance Manual
TM 5-4940-225-20P	Organizational Maintenance Repair Parts and Special Tools Lists

5. How to Locate Repair Parts

a. When Federal stock number or reference number is unknown:

(1) *First.* Using the table of contents determine the assembly group within which the repair part belongs. This is necessary since illustrations are prepared for assembly groups, and listings are divided into the same groups.

(2) *Second.* Find the illustration covering the assembly group to which the repair part belongs.

(3) *Third.* Identify the repair part on the illustration and note the illustration figure number and item number of the repair part.

(4) *Fourth.* Using the Repair Parts Listing, find the assembly group to which the repair part belongs and locate the illustration figure and item number noted on the illustration.

b. When the Federal stock number or reference number is known:

(1) *First.* Using the Index of Federal Stock Numbers and Reference Numbers find the pertinent Federal stock number and reference number. This index is in ascending FSN sequence followed by a list of reference numbers in ascending alphanumeric sequence, cross-referenced to the illustration figure number and item number.

(2) *Second.* Using the Repair Parts Listing, find the assembly group of the repair part and the illustration figure number and item number referenced in the Index of Federal Stock Numbers and Reference Numbers.

6. Abbreviations

dc	direct current
ft	foot (feet)
lh	left hand
mtg	mounting
rh	right hand
PTO	Power take-off

7. Recommendations for Maintenance Publications Improvements.

You can improve this manual by calling attention to errors and by recommending improvements, using DA Form 2028 (Recommended Changes to Publications) or by a letter, and mailing directly to Commanding General, U.S. Army Mobility Equipment Command, ATTN: AMSME-MPP, 4300 Goodfellow Boulevard, St. Louis, Mo. 63120. A reply will be furnished directly to you.
